

# Integrated Remote Support for ServiceNow

## MAXIMIZE IT SUPPORT EFFICIENCY – INTEGRATE WITH BOMGAR

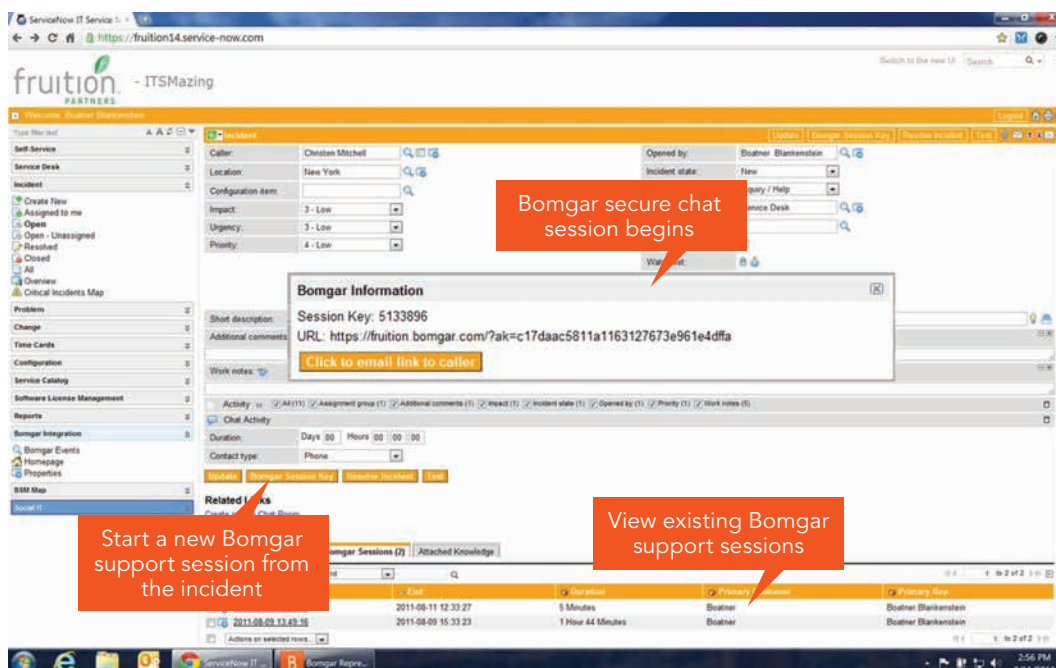

Support and IT organizations using the ServiceNow Service Desk solution can integrate Bomgar to improve service levels, centralize support processes and strengthen compliance. The Bomgar integration with ServiceNow increases the effectiveness of your technicians with robust remote support, secure chat and incident based mobile device support.

## REMOTE SUPPORT SPEEDS RESOLUTION AND CUTS COSTS

The Bomgar integration with ServiceNow allows a support representative to launch a secure remote support session directly from the incident record to immediately begin remotely diagnosing and resolving a problem—increasing first call resolution rates, shortening call times and eliminating site visits. Bomgar’s solution is multi-platform, allowing support technicians to remotely support desktops, laptops, servers and mobile devices across operating systems.

## SERVICENOW SUPPORT CAPABILITIES WITH BOMGAR:

- Technician-initiated remote support session launched directly from the ServiceNow incident record
- Single-click, end-user initiated chat/remote support session via the ServiceNow self-service portal
- Incoming Bomgar support requests are automatically routed to the least busy technician (Enterprise license only)
- Easy technician access to the associated incident record
- Automatic updates of ServiceNow incidents and change requests with details from each Bomgar remote support session
- Bomgar post-session survey results can be automatically included in the updated incident details
- Technicians can Jump directly to a remote system (configuration item) directly from an incident or change request
- Advanced logging and recording capabilities for a complete record of the support transaction

**Service Desk Efficiency:** Rep can start and view Bomgar support sessions associated with an incident.

## PROMOTE SELF-SERVICE WITH SECURE CHAT & REMOTE SUPPORT

With Bomgar, support representatives can communicate securely with customers and other team members. Bomgar records chat transcripts and full session details, ensuring the audit trail is complete. Transcripts of the sessions are automatically saved in service desk tickets where they can be easily reviewed by technicians and managers.

- **Chat** with customers and other support technicians or teams
- **Create** and send pre-scripted canned messages
- **Send** useful URL links to the remote customer
- **Elevate** from chat to full remote support with just one click

## IMPROVE SERVICE LEVELS & CUSTOMER SATISFACTION

Monitor customer satisfaction and support performance with Bomgar's customizable surveys. Administrators can survey both the customer and the support technician at the end of each remote support session.

- **Increase** survey response rate with immediate survey delivery after each session
- **Customize** the survey format
- **Create** separate surveys for customers and technicians
- **Create** unique surveys for each of your customer groups

## SUPPORT VIRTUALLY ANY PLATFORM, ANY DEVICE, ANYWHERE

Bomgar offers the broadest multi-platform remote support capabilities so that technicians can provide comprehensive support no matter what devices end-users are using or where they're located. Bomgar also allows reps to work *from* their preferred device, whether it's a laptop, smartphone or tablet.

- **Support** end-users running Windows, Mac, Linux, BlackBerry, Apple iOS, Android, and Windows Mobile (capabilities vary by platform)
- **Provide** support from Windows, Mac and Linux computers, as well as Apple iOS and Android smartphones and tablets

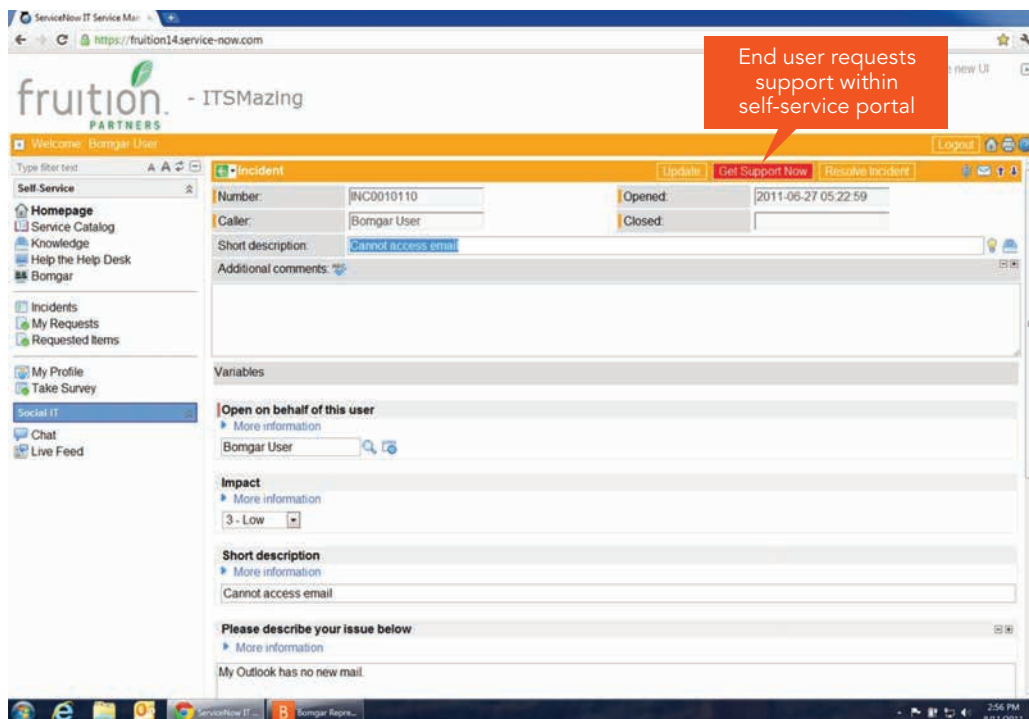

## ASSURE DATA SECURITY & COMPLIANCE

Bomgar's appliance-based architecture keeps sensitive remote support logs and screen sharing recordings in-house, rather than routing them through a third party. Maintain an automated, detailed audit trail with Bomgar's security-tested appliance.

- **Secure** remote access to internal systems
- **Automated** record of every remote support session

## INCREASE EFFECTIVENESS, EFFICIENCY & RETENTION OF TALENT

Bomgar lets technicians work directly with the systems they're supporting - from anywhere. Eliminate travel costs, lower your cost per call, and allow staff to serve customers regardless of location.

**Self-Service:** End-users can also start a Bomgar session directly from ServiceNow.

### Multi-Session Control

- Tabbed interface for easy multi-tasking
- Troubleshoot multiple systems at once
- Reboot and reconnect (even in Safe Mode)

### Presentation Mode

- Show rep's screen to 15 people
- Train remote customers / employees
- Record videos of training sessions

### Scripts

- Create and organize pre-built scripts
- Automate routine troubleshooting
- Share scripts across teams

### Escalate / Collaborate

- Share / transfer sessions with other reps or outside vendors
- "Rep invite" for escorted guest tech access
- Chat with team members

### File Transfer

- Drag-and-drop files
- Enable / Disable file transfer for individual reps or teams

### Jump Technology

- Access unattended servers or desktops
- Instant multi-platform remote access (via pre-installed Jump Client)
- Clientless remote access for Windows systems (via Jumpoint)
