Mac OS X	OS X 10.4 - 10.7	OS X 10.4 - 10.7	•	•
Linux	Fedora Core 13 - 14 RedHat Enterprise 5 - 6 SLED 10 SP3 and 11 SP1 SLES 10 SP3 and 11 SP1 Ubuntu 10.04 and 10.10	RedHat Enterprise 5 - 6 SLED 10 SP3 and 11 SP1 SLES 10 SP3 and 11 SP1 Ubuntu 10.04 and 10.10	•	•
Mobile Devices	Apple iOS 4.3+ (iPhone, iPad, iPod Touch)	Apple iOS 4.3+ (iPhone) New Apple iOS 4.3+ (iPad)	•	•
	Android 2.2+ (Phone) Android 3.0+ (Tablet)	Android 2.2+ (Phone) New Android 3.0+ (Tablet) New	•	•
	BlackBerry OS 4.3 - 7.0	N/A	•	•
	Windows Mobile 6.0 - 6.5	N/A	•	•
Attended Systems	Laptops, Desktops, Mobile Devices		•	•
Unattended Systems	Laptops, Desktops, Servers, Kiosks, POS Systems, etc.		•	•
Network Devices	Routers, Switches and Devices via SSH/Telnet		•	•
Multi-Language Support¹	View Bomgar applications and interfaces in German, EU Spanish, Latin American Spanish, EU French, Italian, Dutch, EU Portuguese, Brazilian Portuguese, Turkish, Japanese, and Simplified Chinese. Supports international character sets.		All available languages	English + 1 additional language
Support Toolset	Use advanced troubleshooting tools to interact with remote systems.		Enterprise	Standard
Representative Console	Support remote computers, systems, and mobile devices through an interface designed specifically for support professionals and equipped with troubleshooting tools.		•	•
View or Control	View or control remote computers, servers and mobile devices.		•	•
Application Sharing	Allow customers to restrict screen sharing to specific applications.		•	•
Bomgar Button	Deploy a "Get support" button on remote computers and mobile devices. Centrally manage and report on all deployed Bomgar Buttons.		•	•
Command Shell	Directly access the command shell for system diagnostics, network troubleshooting, or low-bandwidth support, without screen sharing.		•	•

¹Translated versions of this release will be available at a date later than the English release date.

Feature Name	Description	License Type	
Custom Link	From within a session, click a button to open your browser to an associated CRM record or help desk ticket.	•	•
Elevate Customer Client	Elevate the customer client to have administrative rights. Special actions can be run in the current user context or in system context.	•	•
File Transfer	Transfer files to and from the remote file system.	•	•
Intel® vPro New	Gain in-depth control of remote systems, using Intel® vPro features such as BIOS access, IDE-R, remote KVM, and remote power options.	•	
Multi-Monitor Support	View multiple monitors on the remote desktop.	•	•
Multi-Session Support	Run multiple simultaneous support sessions.	•	•
Reboot/Auto-Reconnect¹	Reboot and automatically reconnect to the remote computer. The end-user can specify login credentials.	•	•
Remote Screenshot New	Capture a screenshot of the remote system.	•	•
Restrict End-User Interaction Improved	Disable the end-user's mouse and keyboard input to avoid customer interference. Account permissions determine whether the customer can or cannot see the screen while you are working.	•	•
Session Notes	Enter notes about support interactions. Session notes are accessible to collaborating representatives and appear in session reports.	•	•
Scripts	Run custom command shell scripts to perform common processes.	•	•
SMS Session Start	Send a session key via SMS to begin a remote support session with a mobile device.	•	•
Special Actions Improved	Access common actions such as Registry Editor, Event Viewer, System Restore, etc. Perform actions in User or System context.	•	•
System Information	View in-depth system information in an easily navigable interface.	•	•
Training & Presentation	Give presentations to multiple attendees, or share your screen with your customer during a support session.	•	•
Virtual Pointer	Display a pointer on the customer's screen, even in view-only mode.	•	•
Collaboration	Work with other representatives and experts to resolve support cases.	Enterprise	Standard
Support Teams	Collaborate with other representatives who share similar skill sets or areas of expertise. Based on issue type or severity, a support request may be routed to a team specialized to handle such problems.	•	•
Queues	Accept support requests from team queues or a general queue. Your personal queue contains both your active and pending sessions.	•	•
Equilibrium	Receive support session assignments based on comparative idle time and session load.	•	
Session Sharing & Transfer	Collaborate with other representatives by sharing a session, or transfer a session to another representative or team.	•	•

¹Reboot/Auto-reconnect is not supported on Mac computers.

Feature Name	Description	License Type	
Access Sponsor	Request a sponsor to elevate your permissions on the remote system by joining the session or entering credentials on your behalf.	•	
Rep Invite	Invite anyone – internal or external – into a shared session with one-time, limited access.	•	•
Embassy	When supporting products or services provided by a third-party vendor, utilize the vendor's support resources.	•	
Jump Technology	Access unattended remote desktops, servers, and other systems.	Enterprise	Standard
Jump Client	Access any Windows, Mac, or Linux system. Add password-protection for security. Centrally manage and report on all deployed Jump Clients.	•	•
Scripted Jump	Automatically initiate a remote support session from an external program by launching a Jump Client on a remote computer.	•	•
Jumpoint	Access unattended Windows systems on a network, with no pre-installed client. Connect through proxy servers by storing credentials.	•	•
Jump Zone Proxy	Use a Jumpoint as a proxy to access systems on a remote network that do not have a native internet connection.	•	
Shell Jump	Connect to SSH/telnet-enabled network devices through a deployed Jumpoint.	•	•
Chat and Messaging	Communicate easily with customers and other support personnel.	Enterprise	Standard
Click-to-Chat	Start support sessions with web-based chat, requiring no customer download. Sessions can be elevated if deeper support is needed.	•	•
Customer Client	Chat with customers during both support and training sessions.	•	•
Canned Messages	Access a library of chat responses to common questions.	•	•
Nudge Customer Client New	Send audible and visual alerts through the customer client when end-user interaction is needed.	•	•
Spell Check New	Catch misspellings and view suggested corrections.	•	•
URL/File Push	Push a URL through the chat interface to launch a browser on the remote computer. Pushing a file through the chat interface prompts the customer to accept the download.	•	•
Team Chat	Chat with all representatives on a team or with an individual.	•	•

Features for Remote Support Representatives by License

Features for Support Managers

Feature	Description	License Type	
		Enterprise	Standard
Support Portal	Define and automate customer interaction.	Enterprise	Standard
Agreements/Messages	Customize messages for each portal. Options include: Customer Legal Agreement, Customer Greeting, On Hold Message, Orphaned Session Message, and Redirect URL.	Multiple Portals	One Portal
Bomgar Button	Customize Bomgar's single-click "Get support" icon.		
Click-to-Chat	Brand Bomgar's no-download, web-based chat option.		
Connection Options	Define how sessions begin for each portal: Representative List, Presentation List, Session Keys, Issue Submission, Click-to-Chat.		
Customer Client	Customize the branding and behavior of the Bomgar customer client, which is used by customers in remote sessions.		
Exit Surveys	Monitor customer satisfaction, and require representative comments on support sessions.		
HTML Template	Edit the HTML of the public site, uploading linked files to the file store.		
Multi-Language Support¹	View Bomgar applications and interfaces in German, EU Spanish, Latin American Spanish, EU French, Italian, Dutch, EU Portuguese, Brazilian Portuguese, Turkish, Japanese, and Simplified Chinese. Supports international character sets.	All available languages	English +1 additional language
Apple iOS Configuration Profiles	Offer public or private, administrator-configured profiles to Apple iOS device users.	•	•
Customer Downloads	Provide links for the customer to download the chat transcript and a Flash video of the screen sharing session.	•	•
Post-Session Redirect	Define a URL to automatically open when a customer exits a session.	•	
User Management	Centrally manage users and groups.	Enterprise	Standard
User Accounts	Create an unlimited number of named rep accounts.	•	•
Group Policies	Define account permissions for entire groups of users.		
Support Teams	Create support teams based on skill set or experience level.	•	•
Access Sponsor	Allow a lower tier representative to gain elevated privileges by requesting a sponsor to enter credentials on his or her behalf.	•	
Embassy (Vendor Access)	Grant limited access to teams of vendors to receive support or utilize vendors' resources in support calls.	•	
Rep Invite	Create profiles so that representatives can invite anyone –internal or external –into a shared session with one-time, limited access.	•	•
User Collaboration	Define support session sharing and transfer options.	•	•
Team Collaboration	Define how multiple teams may interact.	•	
Message Broadcast	Send a pop-up message to all logged-in support representatives.	•	•

¹Translated versions of this release will be available at a date later than the English release date.

Feature	Description	License Type	
Administrative Dashboard	Oversee team support activity, monitor representatives' sessions or desktops, and take over or transfer sessions owned by someone else.	•	
License Monitoring	Receive email alerts on license usage.	•	•
Allocate/Reserve Licenses	Allocate and reserve licenses for each team.	•	
Inactive Session Timeout	Remove an idle representative from a support session after a specified time of inactivity.	•	•
Routing Automation	Automate routing of support requests, and balance support load.	Enterprise	Standard
Issue Submission	Implement issue submission on your public site to direct support requests to the team designated to handle the selected issue.	•	•
Queues	Assign issues to support teams so that customers facing a particular type of problem will be routed to the correct team queue.	•	•
Equilibrium	Set rules, based on representative session load and idle time, to automatically route support requests to the least busy representative in a team.	•	
Support Toolset	Equip your support representatives on a user, team, or site basis.	Enterprise	Standard
Representative Permissions	Restrict or enable toolset components (ex., View or Control, File Transfer, System Information, Reboot, etc.)	•	•
Jump Technology	Define rules for remote access to unattended systems.	•	•
	Set expiration dates for Jumpoints.	•	
Canned Messages	Store responses to common questions to help representatives be more efficient and consistent while chatting with customers.	•	•
Scripts	Create command shell scripts for representatives to use during sessions, increasing efficiency by automating common processes.	•	•
Reports	Report on all session activity; customize, filter and export reports.	Enterprise	Standard
Reporting Permissions	Manage each user's reporting privileges.	•	•
Support Session Reports	View details of each support session, including a complete chat transcript, permissions requested, and files transferred.	•	•
Session Recording Videos	Record annotated videos of support sessions, command shell sessions, and presentations.	•	•
Support Summary Reports	See an overview of support activity over time, categorized by representative, team, or public site.	•	•
Exit Survey Reports	Monitor customer and representative surveys.	•	•
Team and Embassy Reports	View details of activity within a team or Embassy, including login and logout times, team chats, and files shared.	•	•
Bomgar Analytics¹	Use customizable data visualizations to see trends, identify weak support areas, and improve service desk efficiency.	•	

Features for Support Managers by License

¹Additional requirements may apply.

Features for System Administrators

Feature	Description	License Type	
		Enterprise	Standard
Mass Deployment	Install Bomgar applications on multiple systems simultaneously	Enterprise	Standard
BES- Deployable Bomgar Buttons	Mass deploy Bomgar Buttons on BlackBerry® Smartphones via the BlackBerry® Enterprise Server (BES).	•	•
MSI Installer	Create MSI installer packages for Representative Consoles, Jump Clients, Session Recording Viewers, and Bomgar Buttons (Windows only).	•	•
Identity Management	Define Bomgar accounts using existing data on directory servers.	Enterprise	Standard
LDAP/Active Directory	Use LDAP/Active Directory to manage Bomgar users.	•	•
RADIUS [Multi-factor]	Use RADIUS for multi-factor authentication.	•	
Kerberos [Single Sign-on]	Use Kerberos for single sign-on.	•	
Backup and Redundancy	Monitor and back up the Bomgar Appliance.	Enterprise	Standard
Backup Integration Client	Schedule automatic retrieval and storage of software backups.	•	•
Bomgar Atlas Cluster Technology	Use one Bomgar site across multiple Bomgar Appliances to enhance responsiveness across wide geographic deployments.	•	
Appliance Failover	Define and automate redundancy/failover options.	•	
Integration	Integrate Bomgar with external systems.	Enterprise	Standard
Custom Link	Configure a custom link to include a variable for a session's external key, pointing the URL to an associated CRM record or help desk ticket. A representative can access this link from within a session.	•	•
API	Integrate with external systems and set API permissions.	•	•
SNMP Monitoring	Monitor the Bomgar Appliance using Simple Network Management Protocol (SNMP).	•	
Syslog Integration	Send log messages to an external syslog server.	•	
Enterprise Integration Client	Transfer session logs, session recordings, and software backups from the Bomgar Appliance to an external system. Supported systems are Windows-based file systems and Microsoft SQL server. Schedule data transfers to take place automatically.	•	
Software Development Kit [SDK]	Create custom integrations for Bomgar's Integration Client.	•	

Features for System Administrators by License

Additional Integration Options

Additional integration options are available to Bomgar customers, as well.

Integration Option	Requirements
Service Desk Integrations Automate your integration of Bomgar with HP Service Manager or BMC Remedy Action Request System by requesting pre-packaged integration adapter, and drastically reduce integration time.	BMC Remedy Action Request System 7.x+ Requires Enterprise Bomgar Licenses
	HP Service Manager 7.0 and up Requires Enterprise Bomgar Licenses
	BMC Service Desk Express 9.0+ Maintained by BMC; Free
CRM/Ticketing Integration Use the Bomgar API to create a simple integration between your CRM or ticketing system and Bomgar, allowing support reps to a CRM record or Helpdesk ticket directly from the Bomgar Representative Console.	Bomgar API 1.6.0
3rd Party Professional Integration Services Because Bomgar's API, SDK and Integration Client conform to industry protocols, it is possible for customers to contract with a third-party professional services provider to outsource integration needs.	Contact Bomgar Sales for References.
Bomgar Professional Services Contract with Bomgar for custom integration needs.	Contact Bomgar Sales.
Bomgar Analytics¹ Use customizable data visualizations to see trends, identify weak support areas and improve service desk efficiency.	Requires Enterprise licensing. Add-on component. Contact Bomgar Sales.
