

Bomgar Verify for Administrators

Maximize ROI with Bomgar University Training

Our Bomgar University training services are designed to elevate your support organization performance, and maximize your investment in Bomgar. Superior training is part of our commitment to help you obtain the maximum benefit possible from the entire Bomgar Verify solution. Our training options will give your organization the foundational knowledge needed to administer, configure, and utilize

Bomgar for optimum performance. You can select from a variety of modular training courses to ensure your team receives relevant education.

BOMGAR TRAINING FOR ADMINISTRATORS

The **Bomgar Verify for Administrators** course is ideal for system and network administrators who plan on using Bomgar Verify to implement two factor authentication for increased security across a variety of environments. This course gives you all the details needed to configure and manage two factor authentication and integrate it with your existing infrastructure.

FLEXIBLE TRAINING OPTIONS: ON-SITE OR VIRTUAL

This course is available as an on-site course at your location, or you may choose to sign up your administrators for seats in the online virtual courses regularly scheduled by Bomgar. The course length is 1 day on-site, or two half-days virtually. This course is led by a certified Bomgar instructor.

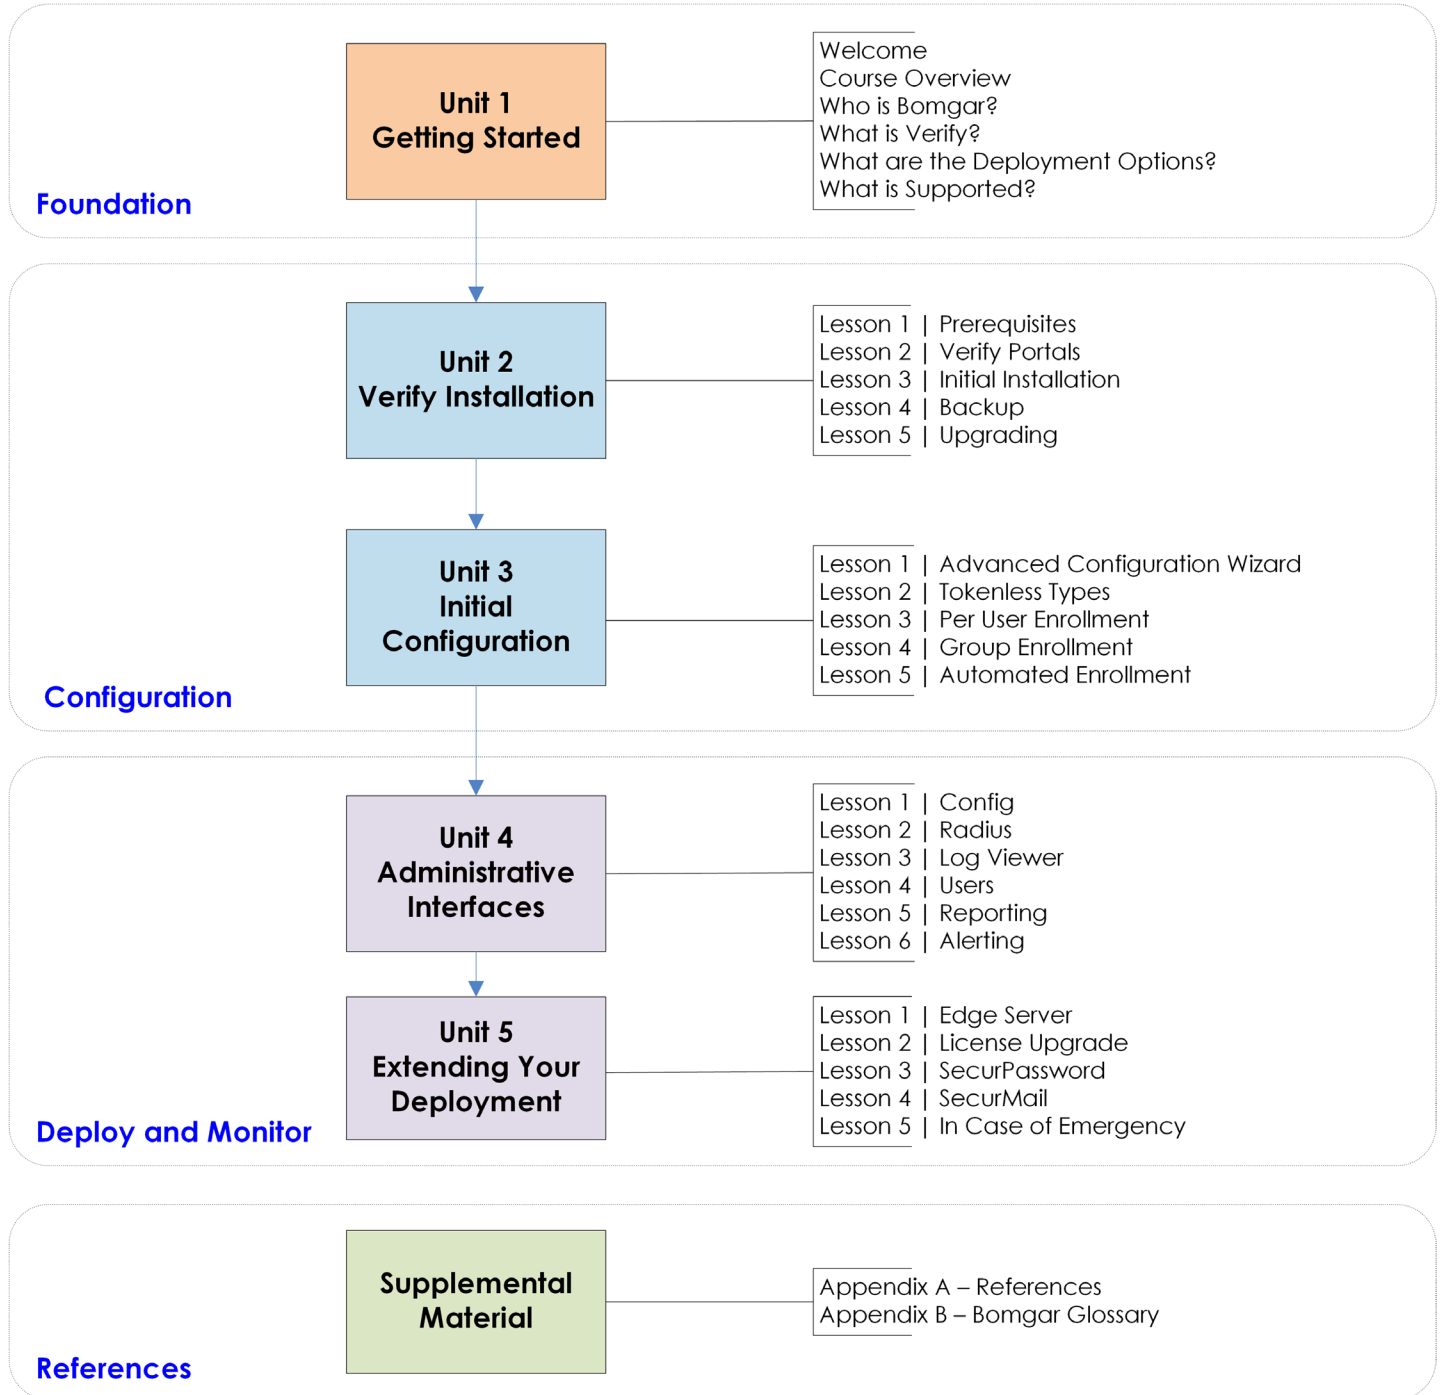

KEY LEARNING OBJECTIVES

- **What is Verify** – provides an overview of how and why Verify is used, and what server topologies and interfaces are needed to support it.
- **Deploying Verify** – details the necessary installation and configuration items of the Bomgar Verify software.
- **Tokenless Types** – explains the multi-factor types available in Verify and the benefits of each.
- **Administrative Interfaces** - explains the administrative interfaces available in Bomgar Verify for user configuration, reporting, alerts, and other functions.
- **Token Enrollment** - gives you the tools and details to enroll your users in Bomgar Verify authentication.

Bomgar Verify for Administrators

For System Administrator & Network Administrator
